PROFESSIONAL SUMMARY

Backend-focused .NET Developer with 3+ years of experience designing scalable and secure ASP.NET Core applications and ASP.NET Core Web API applications using C#, SQL Server, Entity Framework Core, ADO.NET, and Dapper. Expertise in Clean Architecture, RESTful API development, JWT-based authentication, Content Security Policy (CSP), URL encryption, and database performance tuning. Experienced with JavaScript, JSON, and AJAX for seamless client-server communication. Skilled in building secure, maintainable, and high-performance applications, and delivering enterprise-grade solutions for government and international clients.

TECHNICAL SKILLS

- **Programming Language:** C#, SQL, JavaScript
- **Frameworks & Platforms:** .NET Core, ASP.NET MVC, ASP.NET Core Web API
- **Data Access & ORM:** SQL Server, ADO.NET, Dapper, Entity Framework Core, LINQ, Store Procedures
- **Frontend Technologies:** HTML, CSS, Bootstrap, jQuery, AJAX, JSON
- **Data Structures & Algorithms:** Arrays, Linked Lists, Strings
- **Security:** JWT Authentication and Authorization, Content Security Policy (CSP), URL Encryption
- **Architecture & Concepts:** OOPs, SOLID Principles, Clean Architecture, Repository Pattern, RESTful APIs, Middleware
- **Tools:** Git, GitHub, GitLab, Swagger, IIS, Visual Studio, Jira

PROFESSIONAL EXPERIENCE

Akal Information Systems Ltd. - New Delhi

Full Stack .NET Developer

March 2025- Present

- Designed and developed a full-stack .NET web application using .NET Core 8, following the complete Software Development Life Cycle (SDLC), including requirement analysis, design, development, unit testing, and deployment.
- Implemented Clean Architecture with proper separation of concerns and applied SOLID principles to ensure scalable, maintainable, and testable code also Implemented Dependency Injection, exception handling to improve application maintainability and debugging efficiency.
- Developed and secured RESTful APIs and implemented JWT-based authentication and authorization to protect application endpoints.
- Implemented Content Security Policy (CSP) and URL encryption to enhance application security and prevent common web vulnerabilities.
- Built modular backend services using the Repository Pattern, Dependency Injection, and Middleware following clean architecture best practices.
- Designed and optimized SQL Server database components, including stored procedures, views, functions, transactions (rollback mechanisms), audit tables, temporary tables, and advanced search queries.
- Utilized ADO.NET and EF Core for efficient data access and improved application performance.
- Integrated frontend components with backend services using AJAX and JSON to enable seamless asynchronous data communication.

PROJECTS

Akal Information Systems Ltd. - New Delhi

March 2025 - Present

CVOIS - Chief Vigilance Officer Information System

Technologies Used: .NET Core 8, C#, SQL Server, AJAX, JSON, JavaScript, jQuery, OOP Principles, IIS, ADO.NET, Dapper

- Designed and developed a secure, monolithic web application to digitize and streamline vigilance case management processes for the Central Vigilance Commission (CVC). The system enables complaint registration, case lifecycle tracking, officer assignment, status monitoring, and real-time reporting dashboards.
- Contributed to application maintenance and led the upgrade to .NET 8 architecture, improving performance and scalability.
- Implemented a 3-Layered Architecture to ensure separation of concerns, improved maintainability, and scalability of the application.
- Developed complete CRUD operations with soft delete and data restoration functionality. Designed and optimized advanced stored procedures, complex SQL queries, and indexing to enhance database performance.
- Optimized database interactions using Dapper and ADO.NET, improving application performance by 30% through SQL query tuning and indexing. Developed dynamic UI components using AJAX, JSON, jQuery, Bootstrap, jQuery Data Tables.
- Deployed and configured the application on IIS, ensuring secure hosting, environment configuration, and production readiness.

VSP - Vigilance Status Portal

Technologies Used: .NET Core 8, C#, SQL Server, Dapper, JWT, RESTful APIs, Swagger, JavaScript, AJAX, OOP Principles, Clean Architecture

- Actively involved in designing and developing a secure enterprise-level web application using Clean Architecture principles, ensuring clear separation of concerns across the Domain, Application, Infrastructure, and Presentation layers.
- The system facilitates complaint registration, case lifecycle tracking, officer assignment, status monitoring, and real-time reporting dashboards to enhance transparency and operational efficiency.
- Contributed to the architecture and development of core modules, including the ADMIN, DOPT, and CBI modules of the Vigilance Status Portal (VSP). Developed and maintained RESTful APIs to ensure secure data exchange and seamless integration between system components.
- Participated in UI/UX layout design and front-end structuring, ensuring responsive, user-friendly interfaces aligned with government web standards.

Kreate Technologies Pvt. Ltd. - Ghaziabad

Aug 2023- Feb 2025

Innovative IT and AI Solutions Provider in Oman

Technologies Used: .NET Core 6, C#, SQL, HTML, CSS, JavaScript, OOP Principles, Repository Design Pattern, Git, GitLab

- Developed a comprehensive web application for Oman, leading end-to-end development while ensuring cultural and regional relevance.
- Implemented the Repository Pattern – Designed a scalable architecture by separating the data access layer from business logic, improving code modularity and testability.
- Applied Object-Oriented Principles (OOP) – Designed modular components, reducing redundancy while optimizing Data Access Objects (DAOs) and Models to enhance system flexibility and database performance.
- Developed multiple controllers and views to manage user interactions and data presentation, adhering to the MVC architecture.

○ **Atal-Bhujal Yojana (ATAL JAL) - A Community-Led Groundwater Management**

Technologies Used: .NET Core 6, C#, SQL, HTML, CSS, JavaScript, OOP Principles, Repository Design Pattern, Git, GitLab

- Built a scalable web application to manage **community-led sustainable groundwater management and water resource data for government departments**.
- Ensured High Code Quality – **Conducted unit testing and debugging, optimizing performance, reliability, and maintainability**.
- Improved the user interface by implementing responsive features using AJAX and JSON, ensuring seamless and dynamic interactions.
- Implemented Multi-Language Support – Enabled users to access the platform in multiple regional languages, improving accessibility and usability.

○ **DEBUG IT SERVICE Pvt. Ltd. - Gurgaon**

Feb 2023- Aug 2023

Energy FZE

Technologies Used: .NET Framework 4.8, C#, SQL, HTML, CSS, JavaScript, OOP Principles, Repository Design Pattern, Git

- Engineered a fuel management **web application to streamline tracking, distribution, and logistics of diesel, petroleum, and fuel oil supplies across the UAE**. Integrated real-time data processing using AJAX and JSON, enhancing user interaction with live updates on stocks, deliveries, and supplier coordination.

 EDUCATION AND CERTIFICATIONS

- **Bachelor of Technology in Computer Science and Engineering** - Aligarh College of Engineering and Technology
- **Programming Basics Certification** - Great Learning Academy
- **Software Testing Certification** - Great Learning Academy
- **Front End Development Certification HTML** - Great Learning Academy
- **Front End Development Certification CSS** - Great Learning Academy

 ACHIEVEMENTS

- Practiced data structures and algorithmic problem-solving using C# including arrays, strings, linked lists, and mathematical logic programs.
- Built a collection of C# programs demonstrating proficiency in data structures, array and linked list implementations, and logical problem-solving techniques.
- Successfully engineered critical systems and completed projects that improved operational efficiencies.
- Identified and resolved performance bottlenecks in web applications, improving load times by 30%.
- Collaborated with cross-functional teams, including designers and testers, to ensure seamless project delivery and adherence to timelines.
